**WIHA PINI ELECTRICI IZOLATI, COLOUR CODE DIN BLAU | 2,50 /
2,50**

Description

It is especially important for electricians to ensure that individual wires do not get crushed or misdirected when connecting fine-wired lines. If they do, there is a risk of cable breaks or even short circuits, which can potentially cause a fire. Wire-end sleeves can prevent such risks and provide reliable contacts, thus ensuring things work safely for the long term. The conical-shaped collar makes it easier to insert wires into the sleeve. The sleeve also makes it easier to insert the cable into the terminal. Wiha halogen-free wire-end sleeves offer heat resistance up to 105 °C. They are manufactured to DIN 46228 specifications and are certified as per the applicable standards and UL requirements.

Application

Eminently suitable for connecting fine-wired lines, especially terminal connections.

Note

Extension size for DIN dimensions: 0,14 - 0,34 mm²

Greutate:15g

Pret: 0,00 lei (TVA inclus)
