IEK CLEMA SMK 772-248 COMPACT WITH PASTE

For joining the conductors. The spring clamps of SMK terminals ensure reliable and durable contact. Presence of technological hole allows checking for electrical contact between the conductors. The last digit in designation determines number of conductors that can be joined. The advantage of SMK terminals over other types of electrical connections is secure protection from contact with live parts. It has more compact size in comparison with conventional QMS.

The contact paste provides reduction of losses of electric energy in contact connections and protects conductors from oxidation.

Screw-free mounting provides easy and quick installation.

The linear arrangement of the contact group saves space in the junction box, and also makes installation more convenient and fast.

The unique color marking of each terminal size allows you to quickly and correctly identify them during installation.

Transparent housing allows for controlling the depth of approach of the vein. Number of clamp positions: 8

Nominal cross section: 2,5

Colour: EV000270

Nominal voltage: 450

Nominal current: 24

Connectable conductor cross section fine-strand without cable end sleeve: -

Connectable conductor cross section solid-core: 0,5...2,5

Connectable conductor cross section multi-wired: -

Type of electrical connection: EV005755

Type of electrical connection 2: EV005755

Connection position: EV001224

Operation temperature: -25...60

Length: 18.6

Nominal operating AC voltage Ue: 450

Nominal DC operating voltage Ue: 220

Rated insulation voltage Ui: 660

Degree of protection (IP): EV006405

Mechanical Execution Group: EV009088

Width: 16.5

Height: 10.8

Nominal Attachment Capacity: 2,5

Relative air humidity: ≤ 90%

Maintainability: EV000494

Ambient class: IEK_V0000009

Pret: 0,00 lei (TVA inclus)
