

WIHA TOOL SET ELECTRICIAN COMPETENCE XXL II

Description

Conventional toolboxes are often not sufficiently robust, have little storage space and the tools are difficult to remove. The development of Wiha's 115-piece Electrician's Competence Case XXL II has put an end to such problems once and for all. The tool inserts in this case are designed to help you work efficiently by ensuring that all tools can be removed quickly and easily. Thanks to extensive equipment, electricians have the right utensil for every application, such as the LiftUp electric magazine bit holder, a torque screwdriver set, fully insulated screwdrivers from the Wiha Slim line or TriCut installation pliers. The large storage space in the tool case also contains a spirit level specially designed for electricians. Made of robust polypropylene, the case also features gas-filled shock absorbers, which hold the lid in different positions, preventing it from closing automatically and causing injury.

Application

Suitable for working on live parts up to 1,000 V AC. The complete kit for professional electricians out on jobs.

Greutate:19000g

Pret: 10.171,41 LEI (TVA inclus)
