

MAGNUM CEAS CONTROL CU TERMOSTAT, SENZOR DE PODEA 16A/230V
MAGNUM X

DESCRIERE

Termostatul avansat tine cont de perioada necesara de încălzire, astfel încât podeaua este intotdeauna la temperatura potrivita atunci cand vrei. Folia trebuie sa fie pusa pe partea de sus a unui polistiren subtire de 6 mm pentru placa de izolare (MAGNUM Isofoam). Aceasta placa de izolare asigura o izolatie termica suplimentara si, de asemenea, are proprietati de anti-umezire.

Frame IP 21
Voltage 230 Volt - 50/60 Hz
Temperature range +5/+40°C
Maximum capacity 16A - 3600 watt

FI / CE

Technical details

Testing

- Full colour display
- Control via touch sensitive keys
- Chameleon function (8 colour themes)
- Screensaver night clock
