

IEK ANCHOR BRIDA S ZAB 4X16-35 (SO 158)

Anchor clamp ZAB 4x16-35 IEK has a destructive load of 300 kg. Designed to fix the four-wire SIP-4 section from 16 to 35 mm² when branching from the main line and connecting end users. The clamp is made of dielectric material and acts as an insulator. Steel shackle provides extra strength of clip.

Installation is carried out without the use of special tools.

Spring-loaded clamping platform provides ease of installation.

The clamp is easily removable, which allows you to attach it to brackets and hooks.

The special relief of the surface of the fixing platform of the clamp provides a secure fixation of the conductor, prevents it from slipping and does not damage the insulation of the wire.

The elements of the fixing platform are made of a polymer resistant to ultraviolet radiation and adverse climatic conditions.

Manufacturer's warranty is 8 years. Section of retained SIP: 16...35

Ambient temperature: -60...70

Clamping cable diameter: 7,2...9,7

Number of cables: 2 ??? 4

Material: EV000179

Surface protection: EV000154

Max. tensile load: 2940

Pret: 28,37 LEI (TVA inclus)
