

IEK RIM BSI LM-50

Rim band and stainless steel braces are used for fastening protective profiles, brackets and other elements to power transmission line supports. The band is corrosion-resistant, sustainable to extreme temperatures, humidity and weather conditions. Rim band and stainless steel braces are used for fastening protective profiles, brackets and other elements to power transmission line supports.

The band is corrosion-resistant, sustainable to extreme temperatures, humidity and weather conditions. Width: 20

Material: EV000179

Material quality: EV000166

Surface protection: EV000154

Model: EV000118

Direction of punch holes: EV000250

Perforation: EV000494

Perforation diameter: -

Perforation width: -

Perforation length: -

Operating temperature range: -50...60

Length: 50

Thickness: 0.70

Pret: 420,06 LEI (TVA inclus)
