

IEK TARUS IMPAMANTARE 20X1500MM CUPRU - OTEL ZINCAT

Coppering plating provides high electrochemical performance and resistance to mechanical stress. With the help of couplings, the rods are assembled into a single grounding electrode of the required length. An expanded range of earth rods will satisfy any market demand. All main diameters and materials of execution. A wide range of accessories for the product is always in stock. Type of profile: EV001437

Type of connection: EV000154

Length: 1500

Material: EV000179

Surface protection: EV006914

Diameter: 20

Thread size M: 22

Weight: 3,7

Ambient class: IEK_V0000007

Ambient temperature: -60...40

Pret: 0,00 LEI (TVA inclus)
