

IEK PRIZA 124 FIXED 3P+PE 32A 380V IP44

The power connectors are indispensable devices for use indoors and outdoors, together with mobile electrical equipment with cable supply system and stationary equipment of single- and three-phase types. They can be used for connection of construction electrical equipment and tools, machine-tools and other industrial equipment, power supply of workers' cabins and booths, for use in hotels, vacation houses, camp sites, etc. The bodies and insulating parts that support the currentcarrying parts of the power connectors are made from heat-resistant and self-xtinguishing materials.

The securely attached covers protect from ingress of dust and moisture into the connector.

Corrosion protection for springs.

Screws in mechanical and electrical connections are secured from self-unfastening.

Operation in moist environment is possible (IP44, IP54).

Special gland is available for cables of various sizes.

Free space for cable.IEC-amperage: 32

Operating voltage range: 380...415

Nominal frequency: 50

Nominal electric insulation strength: 500

Max. conductor cross section: 6,0

Degree of protection (IP): EV006418

Number of poles: 3

Clock hour position: 6

Connection system: EV001008

Type of fastening: EV009033

Material: EV000139

Identification colour: EV000233

Ambient temperature: -25...+40

Model: EV000384

Voltage acc. EN 60309-2: EV009026

Pret: 34,40 LEI (TVA inclus)
