

IEK PRIZA 233 PORTABLE 2P+PE 63A 220V IP54

The power connectors are indispensable devices for use indoors and outdoors, together with mobile electrical equipment with cable supply system and stationary equipment of single- and three-phase types. They can be used for connection of construction electrical equipment and tools, machine-tools and other industrial equipment, power supply of workers' cabins and booths, for use in hotels, vacation houses, camp sites, etc. The bodies and insulating parts that support the current-carrying parts of the power connectors are made from heat-resistant and self-extinguishing materials.

The securely attached covers protect from ingress of dust and moisture into the connector.

Corrosion protection for springs.

Screws in mechanical and electrical connections are secured from self-unfastening.

Operation in moist environment is possible (IP54).

Special gland is available for cables of various sizes.

Free space for cable. IEC-ampereage: 63

Operating voltage range: 200-250

Nominal frequency: 50

Max. conductor cross section: 16,0

Nominal electric insulation strength: 500

Number of contacts: IEK_V0000071

Degree of protection (IP): EV006419

Clock hour position: 6

Number of poles: 2

Material: EV000139

Identification colour: EV000080

Connection system: EV001008

Cable entry: EV004016

Presence of lock: EV005475

Ambient temperature: -25...+40

Voltage acc. EN 60309-2: EV000154

Angle of plug: EV000164

Pret: 115,14 LEI (TVA inclus)
