

IEK PINI NG 35-16 WITHOUT ISOLATION (100 PCS.)

Tips-sleeves type NShV with no insulation are intended for connecting or terminating wires and cables with copper or aluminum cores from 0,5 to 50 mm² in section in AC and DC electric circuits up to 400 V. They correspond to EN 60998-1, EN 60998-2-2. Simple and fast installation of bunched wires when connecting various electrical equipment.

Reliability of electrical connection.

Several sleeve length options for one section.

Extended operating temperature range compared to insulated lugs including the possibility of using the heat-resistant insulated conductors. Material: EV000138

Surface protection: EV001481

Nominal cross section: 35

Sleeve length: 16

Nominal voltage: 400

Ambient temperature: -40...80

Construction type: EV005866

Insulation material: EV004175

Colour: EV000494

Pret: 50,82 LEI (TVA inclus)
