

### **IEK CABLU CUTTING NK-250**

The cutting tools for cables with plastic and paper insulation is made from free-cutting tool steel. Special configuration of blades allows working safely and quickly. It is featured by high stability and low weight. The segment shears are fitted with ratchet mechanism, extendable handles, cutting lock. The locking mechanism design allows for the blade reverse motion that is necessary when foreign objects are seized in the shears. Extremely high cutting performance of the tools is ensured by optimum design of the shears and cutting blades of special shape. Extremely high cutting capacity of the tool is achieved due to the optimal design of scissors and cutting knives of special geometry. Construction/operation: EV004035

Suitable for maximum cable diameter: 32

Max general section of conducting copper veins of a cable: 185

Max general section of conducting aluminum veins of a cable: 240

Max. cable cross section: 240

Total length: 540

Maintainability: EV000494

Operating temperature range: -25...40

Overall dimensions of scissors: 540?120?35

Grip design: EV009554

Pret: 233,26 LEI (TVA inclus)
