

GTV CORP DE ILUMINAT - VEIOZA LINEAR 7W, 420LM, AC220-240V, 3-CCT, 5 STEP DIMMING, PF>0,5, RA>80, WHITE

LINEAR desk lamp is a functional solution that is an alternative to classic desk lamps. We can read information such as date, time and ambient temperature from a big, readable display. The lamp has an alarm clock function. A user can choose one out of eight available ringtones. A touch panel located in the base makes it possible to adjust the luminous intensity (maximum value is 420lm) and a colour temperature of the emitted light. It is worth choosing a warm colour temperature of 2700K for reading and broadly understood rest. A neutral colour temperature of 4500K will be the most appropriate for work and activities that require concentration. Whilst, for very precise works, a cold colour temperature of 6500K is used. A set includes the lamp with a 1.5m length power cord. Display informing about: date, time and ambient temperature; Alarm clock function with eight ringtones to choose; Luminous intensity can be adjusted; CCT adjustment – a warm, neutral, cold colour temperature. Voltage 220-240 V
Base type Led
Producent code LB-LIN7W-00-DEC
Pret: 0,00 LEI (TVA inclus)
