

GTV CORP DE ILUMINAT PENTRU EXTERIOR - GARDEN FIXTURE KEMI-P 50, E27, MAX.15W, IP44, AC220-240V, 50-60HZ, MAX. 2500W, MOUNTING POST, GRAPHITE

The lamp series in a retro style perfectly combines classic with modernity. It is best to place a decorative filament bulb in the lampshade revealing the light source. In order to gain relaxing, cosy effect after dark, it is good to choose a light bulb with a warm colour temperature and not too high power. For everyone who needs an additional power source in the garden, we have prepared a post with a schuko socket (IP44), to which we can connect devices with a maximum of 2500 W. The lampshade is made of durable polycarbonate; The graphite colour of the fixtures looks great against the background of lush greenery; Replaceable light source allows for individual selection of power and light colour temperature. Power of light source or device 15 W
Base type E27
Producent code OS-KEMIP40G-30
Pret: 0,00 LEI (TVA inclus)
