

**GTV CORP DE ILUMINAT PENTRU EXTERIOR - GARDEN GARLAND 10M, AC220-240V, 50-60HZ,10XE27, 2x0,75MM**

Garland placed on terrace roofs or stretched between trees is an increasingly popular trend. It is an alternative to traditional lighting and at the same time an unconventional decoration – especially when we screw Vintage bulbs with LEDs to it.

By combining several garlands (maximum 22), we gain an amazing light effect and give the environment a magical character. A single section of the garland contains 10 light sources. The garland is built on the H07RN-F wire with a

cross section of  $2 \times 0.75 \text{ mm}^2$  ;

Waterproof connectors that allow you to connect subsequent sections with each other. Producent code AE-GIR10-10

Pret: 0,00 LEI (TVA inclus)
