

**GTV CORP DE ILUMINAT PENTRU EXTERIOR - GARDEN LUMINAIRE MEDIO-P 50  
PIR,E27, MAX.15W,IP54,AC220-240V,50-60HZ,POST,GRAPHITE**

Geometric shapes are the hallmark of modern design that has been the most frequently chosen style by architects for many seasons.

MEDIO series of fittings is in line with modern arrangements of gardens and building facades. Any light source with an E27

thread and power not exceeding 15

W can be used as a

light source. However, ST64

filament light sources from the Vintage and Smoked series look the best.

Thanks to the use of the PIR motion sensor, paths in the garden will be illuminated only when necessary, thus saving electricity consumption. The PIR (infrared) motion sensor detects human body heat, and if it is within the detection range of the sensor, the device will work. Modern design;

Resistant to weather conditions;

Built-in PIR motion sensor. Producent code OS-MEDP50P-30

Pret: 0,00 LEI (TVA inclus)
