Filament light sources complement both modern and classic interior designs. A transparent bulb with visible LEDs makes them an ideal solution for all types of lamps and chandeliers with a visible light source. A neutral colour temperature does not strain the eyes and it helps to focus attention. Unlike a warm colour temperature, it shows true colours because it does not emit yellow colour. They should be used in studies, kitchens and bathrooms. Very high luminous efficiency; a modern solution in a retro style; 4 W; E14: 4000 K: 13 g.
