

**GTV SURSA LUMINOASA - LED LIGHT, SEMI-TRANSPARENT FILAMENT, C35,
4000K, E14, 4W, 420LM, AC220-240V/50-60HZ, RA>80, 360DEGREES**

Filament light sources, unlike standard LED sources, shine with their entire surface. Why did we use a milk bubble in the MILKY series hiding Filaments? Because we understand that their visibility is not always desirable or liked.

The neutral color of light does not strain the eyes and promotes concentration of attention. Unlike the warm color, it does not distort other colors because it does not emit a yellow color.

They should be used
in offices, kitchens and bathrooms. 360
