

GTV LAMPA TAVAN - SUSPENDED LUMINAIRE TRESOS II, 3XGU10, ALUMINUM, IP20, MAX. 3X20W, BLACK

Tresos LED suspended luminaire – refined taste of elegance

Tresos suspended ceiling luminaire is an excellent choice for Scandinavian, minimalist or modern interiors. Its subtle formula perfectly adapts to the character of the interior, complementing it with a charmingly modest line.

Universally simple design fits into the needs of modern kitchens, as island lighting, dining table lighting or ceiling living room lighting. The discreetly unobtrusive form blends in with any type of furniture and is a stylish “dot over the i” in a detailed arrangement.

The Tresos LED ceiling lamp is made of quality aluminum in universally subdued white and refined black. The round frames correspond gracefully with the light design line of the lamp. Thanks to the three separate light points, the light flux is relatively wide and perfectly copes with the introduction of a warm mood of coziness in the interior. The LED suspended luminaire has an adjustable cable length, allowing you to adjust the height of the suspension to your individual needs. Modern design;

Adjustable cable length;

The perfect solution for lighting the dining table or island;
